

Re:Close tape with
a lighter touch

Re:Close Lite is a new version of our popular Re:Close tape which has been carefully engineered to provide the same excellent reseal functionality on a slimmer, more economical product. Resealable packs offer many compelling benefits from food waste reduction to enabling suppliers to maintain a branded presence in consumers' homes.

PRODUCT INFORMATION

KEY BENEFITS

FUNCTIONALITY

Re:Close Lite is engineered to be light weight and slimline without compromising the reseal performance or ease of use.

It offers a cost benefit over alternatives such as zip-lock closures, and improved resealability vs label options.

CONSUMER ENGAGEMENT

Re:Close Lite provides a space for printed information which the customer will automatically notice when using the tape. This is ideal to remind the customer about aspects such as portion control and the recyclability of the packaging.

SUSTAINABILITY

Re:Close Lite is a linerless solution made from single ply, recyclable plastic. It has been manufactured with a reduced amount of materials vs our standard product, making it lighter weight without losing functionality. Filtrona is committed to making our products more sustainable, contact us to learn more about our strategy for this.

APPLICATION

Incorporating Re:Close Lite into your packaging is easy. Our applicator range and technical service expertise ensure you have a system that is suitable for new or existing lines.

- Securely sticks again and again
- Reduces packaging weight and minimises food waste
- Communicate with your customer through the addition of print
- Easy application to a range of pack types and formats
