

RIPPATAPE HALO

An **ECORANGE** product -
Rippatape® only greener

Introducing **Rippatape® Halo** our game changing, patent pending, paper-based Rippatape® that provides frustration free access to paper & board based packaging.

Rippatape® Halo delivers not only on the circularity demands of the paper & board industry, but also delivers on performance without the need for plastic films.

PRODUCT INFORMATION

RECYCLABLE WITH PAPER

In a recent consumer survey, 43% of respondents identified recyclability as a top frustration. Ensuring Rippatape Halo could be reclaimed during board recycling was therefore paramount.

Rippatape Halo has been externally certified as Recyclable with Paper, with repulpability certified A+ to the strict Italian National Recyclability Standard: UNI 11743 and MC 501: 2017 criteria.

PLASTIC FILM FREE

Legislation and consumer passion is calling for packaging to be less reliant on plastic. Rippatape Halo is based on a singly ply, specialised coated paper, with no plastic films or laminates.

PERFORMANCE

Our Rippatape® range has delivered easy, blade free opening for paper & board packaging for over 60 years. Our expert team have worked tirelessly applying their tear tape knowledge to ensure Rippatape Halo offers opening performance to match our market leading Rippatape® 60 product.

APPLICATION

Rippatape Halo can be applied via sheet fed or folder gluers and corrugators, making it a simple switch for production lines using plastic tapes.
